

Garvita Dalmia

garvitadalmia2004@gmail.com • +91 9550195466 • linkedin.com/in/garvita-dalmia • github.com/garvita-d

Software Engineer with production experience building and shipping full-stack web applications using React, Next.js, TypeScript, Node.js, Express.js, RESTful APIs, and SQL. Experienced in frontend architecture, API integration, database-backed applications, authentication, performance optimization, and Agile software development, with measurable impact including ~40% faster reporting and 100/100 PageSpeed performance.

Education

Mahindra University

B.Tech in Computer Science and Engineering

CGPA: 7.5/10

Hyderabad, Telangana

Sept 2022 – May 2026

Experience

Analytics Quad4

Bangalore, India (In-office)

Frontend Developer

Jul 2026 – Present

Frontend Developer Intern

Feb 2026 – May 2026

- Engineered a real-time analytics dashboard using React, TypeScript, RESTful APIs, Ant Design, and Recharts to process live booking data, reducing client reporting turnaround by ~40%.
- Built and optimized 6+ interactive visualizations for revenue segmentation and booking trends; applied useMemo-based memoization to reduce unnecessary component re-renders by ~30%.
- Implemented responsive, production-ready interfaces from Figma designs using reusable React components and component-based architecture.
- Collaborated with backend, product, and QA teams to align API/data contracts and deliver features and bug fixes through Jira in an Agile/Scrum workflow.
- Wrote unit tests, debugged frontend issues, and resolved UI regressions before production releases; promoted from intern to full-time Frontend Developer and retained ownership of the analytics dashboard.

What Next Studio

Hyderabad, India (Remote)

Frontend Developer Intern

Nov 2025 – Jan 2026

- Shipped 6+ features across 2 production Next.js/TypeScript codebases through peer-reviewed pull requests and code review cycles.
- Achieved a 100/100 PageSpeed score across Core Web Vitals by eliminating render-blocking resources and optimizing Vercel deployment configuration.
- Implemented technical SEO infrastructure (robots.txt, sitemap.xml, RSS, Open Graph) and automated social posting via n8n, reducing manual effort by ~60%; analyzed Google Analytics/Plausible data to diagnose and resolve performance bottlenecks.

Projects

DevTrack – Full-Stack Project & Issue Management Platform

Live Demo | GitHub

React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Ant Design, Recharts, JWT, Jest

- Architected a full-stack, projects management & tracking updates platform end to end: a Node.js/Express/Prisma REST API and a React/TypeScript frontend, with JWT authentication (refresh-token rotation) and middleware-based RBAC (OWNER/ADMIN/MEMBER) enforced across both layers.
- Designed a normalized PostgreSQL schema (5 models, cascading relations) powering paginated, filterable, searchable issue endpoints and analytics via aggregate queries; added rate limiting and structured logging (Pino) for production hardening.
- Built a responsive React UI with Ant Design, TanStack Query, and Recharts, centered on a cross-project "My Day" view aggregating work across every project; wrote Jest/Supertest tests, documented the API with Swagger/OpenAPI, and deployed both services to production.

inFlow – Full Stack Finance Dashboard

github.com/garvita-d/finance-dashboard

React.js, TypeScript, Ant Design, Recharts, Supabase, PostgreSQL, Zustand, TanStack React Query

- Architected a full-stack finance dashboard using React and Supabase, implementing authentication, row-level security, per-user authorization, and data isolation for secure financial data access.
- Designed and integrated RESTful CRUD operations for real-time transaction management using TanStack React Query and Zustand; built a responsive component-based UI with SCSS Modules, mobile-first navigation, and system-aware theming.

Dalmia Hardware – Production Business Website

dalmiahardware.com

Next.js, React.js, TypeScript, SEO, Google Analytics

- Built and deployed a production Next.js/React website with TypeScript, reusable components, dynamic product listings, responsive layouts, and technical SEO including sitemap.xml, RSS, and Open Graph.
- Integrated Google Analytics and automated meta-tag generation, improving search visibility and traffic-tracking accuracy.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL

Frontend: React.js, Next.js, HTML5, CSS3, SCSS Modules, Ant Design, Vite, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, API Integration, CRUD Operations, Authentication, Authorization, JWT

Databases: PostgreSQL, MySQL, Supabase, Row Level Security, Schema Design, CRUD

State & Data: Zustand, TanStack React Query, Recharts

Tools & Practices: Git, GitHub, Version Control, Vercel, Netlify, Postman, Jira, Agile/Scrum (SDLC), CI/CD, Unit Testing, Debugging, Code Review, Core Web Vitals, PageSpeed Optimization, SEO

Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Soft Skills: Problem Solving, Independent Ownership, Product Mindset, User-Centric Thinking
